

DUMPSTER *Dust* Deodorant Granules

Product # 437

DESCRIPTION

Super absorbent moisture eliminator and deodorizer. The quick and easy way to clean and deodorize refuse cans, disposal trucks and trash heaps. Absorbs moisture and deodorizes vomitus, pet mistakes and spills.

Dumpster Dust neutralizes and eliminates foul odors as it releases a powerful, clean fragrance. Super absorbent granules soak up many times their weight in excess moisture to prevent the recurrence of odor due to bacterial growth. Simple to use, generously sprinkle where moisture or odors are a problem. No mixing, no spraying, no mess! Available in Mint and Bubble Gum fragrances.

USAGE

Use in areas where application of liquid deodorants is impractical or not feasible. For use in dumpsters, waste containers, garbage collection trucks, trash cans, containers and compactors.

Use to contain liquid spills and to control organic malodor from decomposing foods and grease by-products.

DIRECTIONS

Sprinkle lightly wherever offensive odors are to be controlled. Deodorizes as it dries excess moisture in garbage cans, disposal trucks, trash heaps and dumps. Sprinkle over garbage, trash or refuse after each addition is made to receptacle, truck or dump. Is most effective when used immediately after refuse can has been emptied or after disposal truck has been unloaded. Effectively absorbs moisture and deodorizes vomitus, pet mistakes and spillage.
